`<section> </section>`

`<aside> </aside>`

HTML Entities

space

nbsp - non breaking space

<

<

>

>

- An HTML entity is a piece of text ("string") that begins with an ampersand (&) and ends with a semicolon (;).
- used to display **reserved characters** (which would otherwise be interpreted as HTML code), and **invisible characters** (like non-breaking spaces).
- can also use in place of characters that are difficult to type with a standard keyboard.
- browser interprets them & renders correct character

HTML Entities

Character	Entity	Note
&	<code>&amp;</code>	Interpreted as the beginning of an entity or character reference.
<	<code>&lt;</code>	Interpreted as the beginning of a tag
>	<code>&gt;</code>	Interpreted as the ending of a tag
"	<code>&quot;</code>	Interpreted as the beginning and end of an attribute 's value.
